Tilaisuus on englanniksi – Evenemanget är på engelska – The event will be in English

Experiences of trans refugees and asylum seekers in Finland

The situation for transgender refugees and asylum seekers is far from easy in Finland. Many of these individuals encounter harsh treatment, discrimination and violence due to their backgrounds. Trans asylum seekers do not have the right to receive trans healthcare and trans refugees often end up waiting for years to receive medical care after their arrival. This lecture will focus on some of these issues, as well as on other experiences of transgender refugees and asylum seekers in Finland.
